CLARESHOLM LOCAL NEWS

Born, on August 28, to Mr. and Mrs. J. A. Brown, a daughter.

Born, on August 31, to Mr. and Mrs. Clyde Tucker, of Parkland, a son.

All music pupils of Miss Helen Tillotson will be eligible to play at any of Mr. Moffatt's recitals.

Owing to the wet weather this week the School Fair has been postponed to Monday, Sept. 21st.

The members of the Masonic fraternity will attend divine service at St. John's church on the evening of September 20.

Mr. and Mrs. Alexander, and Mr. and Mrs. Naylor, of Belleville, Ont., have been the guests of the former's sister, Mrs. Tillotson, for the past two weeks.

All electric light patrons are warned against using fuse plugs of more than 15 amperes. The use of fuse plugs of higher amperage greatly endangers your property.

Bebe Daniels in "Miss Bluebeard" at the Rex theater Friday and Saturday nights this week. It's a Paramount picture. The comedy will be Monty Banks in "Wedding Bells."

John Edlund is laid up with a broken leg, due to an accident while on a holiday trip in the southwest corner of the province. He is getting along as well as could be expected.

The fire department had a call to J. S. McAlpine's house one evening this week where a blaze had started from using a high amperage fuse plug. Luckily it was discovered in time to avert serious damage.

H. A. Wenger, who has been running the Blue and White service station here for a year or so past, left this week with his family, for Carstairs where he has taken a position with the National Elevator Company.

Threshing is being held up by very wet weather. Rain last Friday night and Saturday, and again on Wednesday and Thursday, have completely tied up all harvesting operations for the time being. Reports indicate that the rain is general all over the province.

The Woman's Institute will hold their annual constituency conference at the Agricultural College, Clareholm, on September 26th, two weeks from Saturday. The program will be published at an early date. Starline Institute will be hostesses on this occasion.

Vern E. Hoshaw, age 28, a farm hand well known in the district and recently employed by Delbert Reynolds, died in the local hospital on September 8, of pneumonia. The funeral service held at the Methodist church on Friday, September 11, interment being in Clareholm cemetery.

Alfred Adams, aged 60, died on September 7th, of cerebral embolism with Bright's disease as a contributory cause. It will be remembered that his wife died in December, 1923. The late Mr. Adams was a brother-in-law of J. J. Vance of Meadlow Creek. His mother and a brother reside at Portage la Prairie, Manitoba.

Rev. W. C. Marsh announced on Sunday evening that he had decided to accept the call to St. Gabriel's church, Calgary, which had been offered to him by the Bishop. Mr. Marsh expects to conduct the harvest thanksgiving services here on October 4th, after which he will go to Calgary where his induction in the new parish will take place on October 9th.

A number of changes of residence are taking place in town. Dr. Palmer will move into the J. S. McAlpine house. McAlpine will move into the house occupied by W. McKenney on Second avenue, and McKenney will move into the N. Holmes house on Shelter street. Mrs. Vearencum has moved into the first house west of the skating rink on 24th avenue, and Crummins have moved into the house just vacated by Mr. Vearencum.

FEDERAL ELECTIONS OCTOBER 20

Election Will be Fought on the Issues of Transportation, Immigration, Fiscal Policy and Senate Reform

Richmond Hill, Ont., Sept. 5.—Parliament is dissolved. Addressing his constituents of North York here this afternoon the premier declared his intention to appeal to the polls. The date of the coming election is officially set for Thursday, October 29.

Two cabinet changes were indicated by Premier King: Hon. J. A. Robb, minister of immigration and acting minister of finance, becomes minister of finance in the stead of Rt. Hon. W. S. Fielding. Hon. G. N. Gordon, deputy speaker of the house of commons, becomes minister of immigration in the stead of Mr. Robb.

The premier announced also that Sir Henry Thornton's contract as president of the Canadian National Railways had been renewed for a further period.

U. S. Civil War Veteran Dies

Another of the American civil war veterans passed away here on Saturday last in the person of Joseph H. Abbey, a native of New York state, and until recently a resident of the western states. The late Mr. Abbey was born in New York state on September 23, 1839, and when the civil war broke out he enlisted with the Fourth Michigan Cavalry, and served for four years and six months, taking part in the famous Sherman's march to the sea.

Some time ago the deceased came into this district to visit his daughters, Mrs. Geo. Lepard and Mrs. Norman Lepard, and a few weeks ago he was taken ill and brought into the local hospital, where he succumbed to the infirmities of old age on Saturday morning.

The funeral service was held on Monday afternoon at Bethel church, the pastor, Rev. Geo. F. Webber, conducting the service at the church and also at the cemetery.

Besides the two daughters mentioned above, one son survives. Ten grandchildren and eight great grandchildren also survive.

Burglary at Granum

Granum, Sept. 7.—The general store of W. B. Rogers was burglarized in the early hours of Sunday morning and various articles from the dry goods section were taken.

A clerk having occasion to visit the store about 10 a.m. Sunday immediately discovered the fact of the store having been entered, the general disorder of the ransacked shelves attracting his attention. It was found they had gained entrance by forcing an outer door leading to the basement, and that at least two were implicated. They helped themselves to such clothing as suited their fancy and appropriated two suitcases to carry away their plunder. So far they have made a clean getaway, but the police are following up clues which promise results.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

In the Estate of Henry Reinhardt, late of Clareholm in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Henry Reinhardt, who died on the 23rd day of April A. D. 1925, are required to file with the undersigned J. R. Watt, Solicitor for the Executor, by the 25th day of September A. D. 1925, a full statement of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 25th day of July, A. D. 1925.

J. R. Watt,
Solicitor for Charles N. Booth the Executor
Clareholm, Alberta.

Making Paper From Straw May Ultimately Become An Important Industry in the West

The future of the paper industry, and indeed, the future of the entire trade of printing, has been caused to anxiously for those closely connected with either, owing to the diminishing supply of paper manufactured from wood. The United States has become the greatest consumer of paper in the world, and as its own softwood supplies have nearly exhausted, the Canadian forests have been more and more drawn upon. This has created an immense export trade in pulp and paper, which is at present of vital importance in maintaining Canada's favorable balance of trade. The report of the commission which recently investigated the pulpwood situation in Canada showed that the visible supply of wood was in danger of exhaustion within some thirty to fifty years, according to conditions in different provinces. After that, what? That was the question.

Recently The Morning Star published an article on paper made from straw, and the information given of that connection is of the greatest importance. The paper was made by the Valin's straw pulp and paper mill, which seems to have lifted the question at once from theory to practice. The trouble in the past has been that straw has been its brittleness, but ten years of experience have overcome this difficulty, using as chemicals only common salt and lime. The straw is carried out in French factories, and, according to The Post, it is to be converted on a large scale into pulp.

If straw becomes the raw material for paper, Canada's position will be greatly satisfied, as it will mean the use of an enormous product of farming which is now wasted. It is estimated that seven million tons of straw are burned annually in Canada alone. In Eastern Canada there is use for straw in connection with the livestock industry, but in the west the burning of the straw after harvest and threshing every autumn, making a trail of fire night by night from the Ontario boundary to the Rockies, is a sad feature of unbalanced industry. The advent of straw-making will bring additional revenue to the government, preserve a great industry for the west, and retain an export trade for Canada of first importance.

The Post does not state exactly how many tons of straw, nor suggest that straw may be a competitor of wood which the latter cannot supply. The paper industry has been one of the most progressive in the whole west of manufacturing in the past few years, and it may be assumed that the new sources of raw material will be used with the keenest intelligence.—Toronto Globe.

Reported Damage

By Wheat Root Rot

Slatter Being Investigated By Dominion Plant Pathologist

Reports of damage to wheat by root rot, a fungus disease which first became evident in the Saskatchewan wheat belt a few years ago, are being investigated by the Dominion plant pathologist, W. P. Francis, Saskatoon. The reports of damage are lacking as yet to form conclusions, it is believed to be confined to the park country in Northwestern Saskatchewan. One farmer north of Humboldt is reported to have sustained 75 per cent damage to a crop which had reached 25 to 40 bushels to the acre. The disease causes the straw to yellow and ripen before the heads fill. It is believed that it is at its worst two or three years after ground is first broken, gradually dying out without continued cultivation. Two field men are carrying out a large area, at present, in the investigation.

Jerusalem Wants Tourist Hotels

Jerusalem is now clamoring for tourist hotels. A stream of tourists come to Jerusalem in the summer from Cairo, Tunis, Malta and other places at the eastern end of the Mediterranean, as Jerusalem stands high above the sea level and is, therefore, cool. The local government has required all the high-roads from Jerusalem to Jaffa, Haifa, Nablus and Tiberias, and they are in good condition for touring.

In the salt marshes of Galilee, tunics and great chambers have been dug aggregating a total length of thirty miles. Many of the chambers live at the lower levels, where they have built and rarely come to the surface.

Cucumber 3,000 Years Old

The cucumber is one of the oldest of the garden vegetables. In the Egyptian tombs 3,000 years ago in the Far East, cucumbers in India, had their origin.

Growth in Manitoba

Some Facts Concerning Agricultural and Dairy Products of Province

In a recent address to the St. James Kiva Kwan Club, H. Evans, deputy minister of agriculture for Manitoba, gave some facts concerning the agricultural and dairy products of the province during the past 50 years.

"In 1876 Manitoba had her first export of wheat," said Mr. Evans. "Today the province has 3,000,000 acres under cultivation, and in one year has produced 3,000,000 bushels of wheat. 'Fifty years ago wheat was trying to work out a programme of farm production in the province which would enable them to make a living. Today, Manitoba has a population of 412,000 with 2,200 schools in which are 2,357 classrooms. There are today 27,000 miles of good roads in Manitoba, 2,500 of which are under the Good Roads Act."

Tracing the rise of the dairy industry in the province, Mr. Evans pointed out that in 1912, 12,000 head of cattle were valued at \$32,500 and the number of cows at \$32,500. In 1912, 20 carloads were imported, and in 1913, 20 carloads. In 1915 the province not only supplied its own needs, but exported 50 carloads of butter valued at \$224,000. Today Manitoba is exporting butter in large quantities.

Experiment Is Successful

Antelope in Alberta Reserve Are Increasing in Number

Antelope which were threatened with extermination in Canada have been successfully preserved in Northern Alberta. The antelope preserve was established in 1915 there were only 15 in the herd, the last survivors of the antelope that once had roamed by the prairie. There are now 225 animals in the herd, a gain of 190. How well they breed in captivity is shown by the fact that there was an increase of 55 in 1912.

Antelope once were prized trophies, and several cities in Canada had a herd of antelope in the city. A herd finally was discovered in Southern Alberta, and the trail of 5,000 head of antelope was being followed by a party of men, and all the work of men without disturbing the animals.

A Japanese Invention

Fluid Injected Into Sheep Promotes Rapid Growth of Wool

An invention which makes sheep grow faster was described by Professor Barber, of Leeds University, at the international conference of sheep breeders at Chester, England. He said a Japanese doctor had placed on the market a fluid which, when injected in the veins of a sheep, promotes rapid growth of wool.

"So rapid is the growth said to be," Professor Barber continued, "that two months' injection produces twice monthly growth at the ordinary rate. This two to three shewings a year are possible."

By Products From Cows

One by-product from cows that is made 210 by-products: Aspirin, for headaches and colds; gelatin, for laxative and medicinal purposes; the dye stuff, a veritable rainbow of colors; ink, paints, roofing, fuel, explosives, chemicals, are among the by-products.

X-ray treatments reduce the severity of whooping cough, says Dr. Lawrence N. Boston, after using them in 750 cases.

A man should not place too much confidence in his companion when he is beside himself.

Ex-President Opens Course

Chief Justice W. H. Tatnell, Ex-President of the United States, Replying to the President of the United States, Mr. Coolidge, at the opening of the ship golf course at the Atlantic Hotel, Murray Bay, Quebec, July 1st.

Chief Justice W. H. Tatnell, ex-president of the United States, replying to the president of the United States, Mr. Coolidge, at the opening of the ship golf course at the Atlantic Hotel, Murray Bay, Quebec, July 1st, prior to leaving off with a 170-yard drive. Mr. Tatnell complimented W. H. Coolidge, President of the Canada Steamship Lines, Limited, on his company's enterprise in 1913, one of the finest golf courses in Eastern Canada, not among some of the finest courses in that part of the Dominion.

Forest Is Protected

No Depletion of German Woodland in 700 Years

In the Black Forest of Germany there is to be found one of the oldest private logging corporations in the world.

This company operates about 16,000 acres of woodland, and annually pays a reasonable dividend for the stockholders, and yet there is just as much timber growing on that land today as there was 700 years ago. The trees, growing almost underground and wild, show still much as little damage, and all of the same age, yet the forest is maintained by promoting natural regeneration. A permanent system of good roads traversing its length and breadth permits the cutting of a few trees here and there, selected and marked in advance by the chief forester, who spends one day in every three solely in the study of how to get the maximum of merchandise product and, at the same time, the maximum of growth. In this way, the same patch of forest is exploited for cutting once every 100 years.

The felling of the trees has to be very skillfully done, so that the fall of the trees will do as little damage as possible to the young trees beneath, but a skilful logger can throw a trunk of timber over his head and the logs are all cut so as to make them easy to move. Even in the hauling of the logs from forest to road, great care is taken to avoid any object with out leaving a trail of devastation behind.

May Solve Rubber Question

Possible to Make Synthetic Product From Corn and Wheat Says Chemist

Dr. James P. Norris, president of the American Chemical Society, seen in the corn and wheat fields of Canada and the United States a possible solution of the disturbing situation recently created by skyrocketing rubber prices.

"If continued high prices force tire manufacturers to appeal to the United States," Dr. Norris said, "it is entirely possible that a method of manufacturing synthetic rubber from corn and wheat derivatives may be developed and the rubber plantation supplanted in some measure at least by the North American farm."

"Several years ago," he explained, "the question of synthesis of rubber from corn and wheat was one of the subjects of the world being a study of its manufacture. Meanwhile, a great increase in rubber plantation production raised the price to fall and chemical research was abandoned."

"Now, however, the chemist is again turning the field and it is hoped that my research men will develop a valuable commercial rubber from acetone, which is a by-product of butyl alcohol, and butyl alcohol is produced from grain."

Aids Individual Financing

Wheat Pool Great Help to Farmers Says Commissioner

Many Saskatchewan farmers have been able to finance their operations on the land this year for the first time without having to borrow money, according to Dr. O'Brien, commissioner of the debt adjustment bureau.

The fact that the wheat pool payments have been good, over the year, stated Mr. O'Brien, has enabled many farmers to finance themselves on current revenue and has resulted in saving them interest on the money they usually borrow during the year.

Mr. O'Brien added that he could not say whether the saving of interest on short term loans was offset by the additional interest accruing on major loans owing to the smaller payments made on these during the fall by many farmers.

Empire Settlement Scheme Appears Promising, Although Only In Experimental Stage

Canada's Best Known Town

Petrolia's Citizens Travel To All Parts Of World

Which is the most widely-known community in Canada?

Known, I mean, at least by name, to the greatest number of individuals, to the most varieties of humanity, and to the most widely-scattered lands of the earth?

Not to Ottawa, the capital; not to Quebec, with its historic associations; not to Halifax and St. John, our eastern gateways; nor to Prince Rupert, our gateway to the north-west; not to Montreal, beloved of the thirty Yankee, nor to Toronto, Mecca of the Canadian intellectual.

But to a community of less than 5,000 people, in an isolated corner of Northwestern Ontario, linked to the rest of Canada, and the world in general, by two "dead ends" of railroad.

Over these dead ends of railroad, however, outward bound, have passed men whose aggregate mileage of world travel is undoubtedly greater than that of any other community of other 5,000 residents of any city of Canada.

The town is Petrolia, the Canadian oil metropolis, and the headquarters of the Canadian oil-drilling empire, which, during the past forty years, has planned for all in all corners of the world.

To Petrolia, travel is more common; as much a part of the everyday life of the community as the crossing of the Canadian oil-drilling empire, which, during the past forty years, has planned for all in all corners of the world.

The return of a Petrolia driller from Persia after a journey of 12,000 miles by land and sea, the departure of a Petrolia driller for Burma or Australia or the Argentine, causes no excitement. World travelers come and go every day in Petrolia.

Petrolia is not the only town in the world dependent on foreign travel for its livelihood. It is a property where other places thrive by reason of the strength of their attraction, Petrolia's property rests on the efficacy it sends into exile.

Yet this Petrolia, which has sent so many drifters to the far ends of the earth, itself attracts no such numbers of the drift from year's end to year's end—Victor Lantieri in Maclean's.

Large Profits In Nut Growing

British Columbia Is Gradually Building Up Good Industry

Canada is becoming more clearly to realize that her substantial import of nuts each year, amounting in value to \$1,000,000, is largely unnecessary.

It is a fact that a large portion at least of the Canadian nut demand could be met by growing in suitable areas the best varieties of native and exotic species of nuts.

Of recent years a small nut growing belt has been established in British Columbia where the climate is particularly suited to the subject and extending the belt to the west coast of the province, it is hoped that a substantial future industry is looked to these.

Always a Favorite Plaything

There are families in the United States that turn out seven thousand dolls a day. Dolls have been played with by small girls from the earliest times and among all nations.

In the British Museum may be seen dolls that are more than three thousand years old. They were found in the tombs of the ancient Egyptians. The Egyptian dolls had bodies of carved wood, and were made of clay or of beads strung on thread. The dolls of ancient Greece and Rome were an improvement on these.

Has Keen Sense of Smell

The rhinoceros is said to be the animal with the keenest sense of smell. One big game hunter has stated that in favorable weather this animal can find a man ten miles away. However, on a dry day it is harder to scent than on a wet day.

Mr. Bing—"Oh, I wish these receipts were more definite."

Mr. Bing—"What's the difficulty, my dear?"

Mr. Bing—"This one tells how to use up old potatoes, but it does not say how old the potatoes must be."

The ambassador of the United States to the president of the United States received a salary of \$175,000 a year, every cent of which he pays to his landlord in Paris as rent for the house that the Embassy occupies.

In Japan gold always is placed in the gutter, and when a person comes who the time of day.

So far as the Vancouver Province judges, the empire settlement scheme is promising, but it is being conducted on a very small scale.

The plan is to place three thousand selected British families on farms in Canada in June, 1915. The Canadian Government is providing the farms, which are for sale on easy terms, and help the newcomers get established. The British Government is advancing money, not exceeding about \$200 per family for travel and machinery. The settlers are being placed in districts that are fairly well settled, and will not have the hardships and loneliness of pioneering to endure. There are neighbors, and arrangements are made for friendly assistance from these.

"The plan is promising, but it is being conducted on a very small scale," the Brodies say. "There are two reasons for this. It is the experimental stage yet, and the families who are given assistance are so carefully chosen that no great number can measure up to the requirements. If it is to be expanded, as it should be, more money is needed. It will probably be some time before the people who have had no great acquaintance with rural life, and to extend the plan to a large number of families, means of raising such as was suggested by Lord Bunsen in his address to the Vancouver Canadian Club."

"Strange as it may seem, the number of farms available is at present almost limited, for the only land being offered for sale is the surplus of the thirty thousand acres taken up under the soldier settlement scheme and abandoned. In a country like this, with millions of acres of land, while the reach of railways, there should be no difficulty in getting farms for all who are willing to be content with ordinary cultivation. We are a very much to be contented country, and might, with considerable advantage, devote some attention to becoming agriculturists."

"It is quite possible that families accustomed to farm life might be secured from the British Isles, and from Europe than in Great Britain. But the settlement of these would require the building of the plating of British immigrants would not involve, as we should have to meet the whole expense ourselves, and would be a very large sum of money. In fact, immigrants to help the Motherland settle her problem of surplus population would be a very large sum of money, and would be a very large sum of money."

ROYAL BANK NOW HAS 800 CANADIAN BRANCHES
Amalgamation With Union Bank Effective September 1 Enlarges Royal Bank Service in Canada

To the mind of the average person, the name, The Royal Bank of Canada, does not adequately convey the manifold activities of this Canadian institution with over 800 branches in Canada and with over 100 branches established in such countries as Cuba, the British and French West Indies, Haiti, Argentina, Brazil, British Guiana, British Honduras, Costa Rica, Colombia, Peru, Uruguay, Venezuela, as well as London, New York, Paris and Barcelona, nor does the average business man realize the wide and varied service this bank is able to render without going outside its own organization.

The Royal Bank of Canada has done much to foster Canadian trade abroad and the value of its service to exporters and importers lies, not in its regular business alone, but also in its willingness at all times to supply information regarding markets and marketing conditions, tariffs and confidential credit reports, etc. The value of this type of service is to be found in the fact that information is gathered direct by managers who are not only on the spot but know intimately local conditions.

In a little over fifty years, The Royal Bank of Canada has grown from a purely local bank to an institution of international importance and today holds a foremost position among the great banks of the world.

The Royal Bank of Canada was incorporated in 1869 as "The Merchants Bank of Halifax." Its name was changed to the present title on January 1, 1901. The head office was transferred from Halifax to Montreal on March 2, 1907.

During the last two decades, a vigorous policy of expansion has been followed. The assets of The Union Bank of Halifax were purchased by The Royal Bank of Canada on November 1, 1910; of The Traders Bank of Canada on September 1, 1912; of The Quebec Bank on January 2, 1917, and of The Northern Crown Bank on July 2, 1918.

The bank's facilities for serving the public in Canada have been greatly increased by the purchase of The Union Bank of Canada, announcement of which was made by the Minister of Finance at Ottawa, on May 22, 1925, and which was unanimously ratified by the shareholders of both banks on July 21. At the meeting of the Royal Bank shareholders held at the head office in Montreal, it was decided to increase the authorized capital of the bank from \$25,000,000 to \$30,000,000, as it has a long record of service to the bank to keep its authorized capital somewhat higher than its paid-up capital.

The purchase of The Union Bank of Canada has added another 270 offices to The Royal Bank's national chain of branches in Canada, thus giving the Bank a total of over 800 branches in the Dominion and more than 100 abroad. The merger will bring the total assets of The Royal Bank of Canada well over 700 million dollars with deposits of over \$600,000,000. The Union Bank of Canada was established in 1865 and has been regarded as particularly a western bank. Its head office was in Winnipeg and the majority of its branches served the farming sections of the prairie provinces.

The absorption of the branches of The Union Bank of Canada by The Royal Bank of Canada was effected on September 1, 1925.

Here and There

Canadian bond sales during the week ending August 1928 amounted to \$398,578, which brings the total for the year up to \$247,659,108. Of this sum \$103,255,827 represents the value of bonds sold in Canada; \$27,978,333 in the United Kingdom; and \$116,745,000 in the United States.

The port of Montreal is well on its way this season to beat all previous records for tonnage received as statistics, obtained from the Harbor Commissioners' office, show that there is a big increase in the number of ships berthed in the port to date, as compared with the number for the same date last year. Up to August 8, 608 boats had docked here and their total tonnage was 1,986,160, while up to August 13, 1924, 537 vessels had used the harbor since the opening of navigation of the 1924 season, and their tonnage was 1,891,267.

One notable feature of the tourist season in the Canadian Rockies this summer has been the demand for saddle horses, according to J. M. Gibbon, secretary of the Trail Riders, who has been in residence in Montreal for some time. The practice is growing of sending the horses in advance to points where the trail crosses a motor road and then commencing a ride at a point thirty or forty miles from one of the resorts. The practice has become so popular that over one hundred riders who participated in the recent three-day cross country ride between Marble Canyon on the Banff-Windermere Highway, to Wapta-Bungalow Camp on the Canadian Pacific Railway, made the trip in less than two hours as it took only two hours to convey the riders from Banff and Lake Louise by motor bus to the points of departure.

Twelve British newspapers representing some of the most important dailies in Great Britain, are now making a six weeks' tour of the country over Canadian Pacific lines. The party will travel from Halifax to the Pacific Coast taking in all the important industrial and scenic points of the country. They will spend a day at the Canadian National Exhibition at Toronto, and will also visit the famous Bungalow Camp in Ontario, as well as the beauty spots in the Rockies. They arrived at Quebec on August 20th, at the Montreale, the object of the tour being to correct in the minds of representative British journalists the erroneous impressions recently made in England regarding Canada by certain sections of the press.

Under the heading, "The Inconsistencies of Men," C. B. Fletcher contributes the following interesting remarks on freight rates, to the August "Railway Review": "Man's progress is measured by his adaptability to his surroundings and his opportunity to trade with his fellow men by exchanging products. Transportation is the essential instrumentality for trade, commerce or business of any kind."

"The phenomenal prosperity of the United States today is the direct result of the most efficient transportation facilities in the world—railroads."

"Railroad transportation is worth ten times what it costs today to every person in this nation. The railroads haul your meat 500 miles for 36 cents a hundred pounds, you pay for 20 cents for cheap cuts to 90 cents for special cuts of meat or from 40 to 180 times the cost of transportation."

"The railroads haul those 400 miles for 13½ cents a hundred, 7 pounds for one cent. You pay 10 cents a pound for bread or 70 times the cost of transportation."

"You pay one dollar for a meal at a first class hotel on which the freight charges were less than two cents, including everything served, and the coal to cook it, and then tip the waiter ten cents or five cents what the railroad received for hauling it 400 miles or more."

"The same man who tips the waiter ten cents will go out and make a speech and complain of high freight rates which are not one-fifth of the amount of his tip."

"Consistency, those are a jewel!"

Another PRICE Suggestion Biscuits, Buns and Rolls

BISCUITS! What delight this word suggests. So tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These are the kind of biscuits anyone can make with Dr. Price's Cream Baking Powder and these unusual recipes:

(All measurements for all materials are level.)
BISCUITS
2 cups flour
1 teaspoon salt
1/2 teaspoon Dr. Price's Cream Baking Powder
1/2 cup cold water
1/2 cup cold milk
1/2 cup cold cream
Sift together flour, baking powder and salt; add shortening and rub in very lightly; add liquid slowly to make soft dough; roll or pat out on floured board to about one-half inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

CINNAMON BUNS
2 1/2 cups flour
1 teaspoon salt
1/2 teaspoon Dr. Price's Cream Baking Powder
1/2 cup cold water
1/2 cup cold milk
1/2 cup cold cream
1/2 cup cold butter
1/2 cup cold sugar
1/2 cup cold cinnamon
Sift together flour, baking powder and salt; add shortening and rub in very lightly; add liquid slowly to make soft dough; roll or pat out on floured board to about one-half inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

DR. PRICE'S
CREAM
Baking Powder

Made from Cream of Tartar, derived from grapes. Pure, wholesome and unvarying in strength. Raises the dough perfectly.

MADE IN CANADA

Sift 2 tablespoons of measured sugar with flour, salt and baking powder; rub shortening in lightly; add liquid to water and add slowly. Roll out 1/4 inch thick on floured board; brush with melted butter, sprinkle with sugar, cinnamon and raisins. Roll up for jelly roll, cut into 12 slices, place with cut edges up on well-greased pan, sprinkle with a little sugar and cinnamon. Bake in moderate oven 30 to 35 minutes; remove from pan at once.

PARKER HOUSE ROLLS
4 cups flour
1 teaspoon salt
1/2 teaspoon Dr. Price's Cream Baking Powder
1/2 cup cold water
1/2 cup cold milk
1/2 cup cold cream
1/2 cup cold sugar
1/2 cup cold cinnamon
Sift together flour, baking powder and salt; add shortening and rub in very lightly; add liquid slowly to make soft dough; roll or pat out on floured board to about one-half inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

Sift flour, salt and baking powder together. Add melted shortening to mix and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out 1/4 inch thick. Cut with biscuit cutter. Grease each side with back of knife one side of each roll. Butter the small section and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 15 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

BLONDIE AND BRUNETTE COME TO TOWN

On the day in early summer, a party of guides were camping near Emerald Lake in the Canadian Pacific Rockies. Now it happened that the campers had with them a very young and very queer dog, as they had been brought up by humans, the guides feared that their native instinct would not assert itself and decided to build a winter bed for them. But even though they had spent the summer with humans, they were going to sleep through the winter in their own lares and penates—the guide den was not dark enough. So the stupid humans learned that all the shades should be pulled down in the little house and all the curtains drawn, and in crowded the two little bears, and when only a day or two later, when one of the guides went to look, they still had their little green-brown eyes partly open but were too sleepy to even be interested in their favorite meal of cakes and syrup. And soon they were off to the Land of Nod to dream sweet dreams until snows grew soft and they could venture out if the sun were bright enough to cast their shadow. And when that time finally came, the first words they heard were the old familiar ones: "How they have grown!"

There never were brighter little bears, no, nor smarter ones. They will keep you entertained always!"

It was all pretty true. But winter was coming and as they had been brought up by humans, the guides feared that their native instinct would not assert itself and decided to build a winter bed for them. But even though they had spent the summer with humans, they were going to sleep through the winter in their own lares and penates—the guide den was not dark enough. So the stupid humans learned that all the shades should be pulled down in the little house and all the curtains drawn, and in crowded the two little bears, and when only a day or two later, when one of the guides went to look, they still had their little green-brown eyes partly open but were too sleepy to even be interested in their favorite meal of cakes and syrup. And soon they were off to the Land of Nod to dream sweet dreams until snows grew soft and they could venture out if the sun were bright enough to cast their shadow. And when that time finally came, the first words they heard were the old familiar ones: "How they have grown!"

After they showed off, Janet is Blondie finishing supper. Taking a swim in the old cedar water.

One day in early summer, a party of guides were camping near Emerald Lake in the Canadian Pacific Rockies. Now it happened that the campers had with them a very young and very queer dog, as they had been brought up by humans, the guides feared that their native instinct would not assert itself and decided to build a winter bed for them. But even though they had spent the summer with humans, they were going to sleep through the winter in their own lares and penates—the guide den was not dark enough. So the stupid humans learned that all the shades should be pulled down in the little house and all the curtains drawn, and in crowded the two little bears, and when only a day or two later, when one of the guides went to look, they still had their little green-brown eyes partly open but were too sleepy to even be interested in their favorite meal of cakes and syrup. And soon they were off to the Land of Nod to dream sweet dreams until snows grew soft and they could venture out if the sun were bright enough to cast their shadow. And when that time finally came, the first words they heard were the old familiar ones: "How they have grown!"

One was a light-brown fluffy thing, so her new friends christened her Blondie, the other being of the dark brown variety, naturally was called Brunette. They were about two months old when Mary Graham Brown met them and so charmed was she with the two baby cubs, that she tells the story in St. Nicholas Magazine. "If you went away and came back in a week, you'd hardly know them, they grow so fast."
